AnyTech365 AntiScam Mobile

Real-Time Protection Against Modern Mobile Scams

Behavioral intelligence and real-time threat analysis for the evolving mobile fraud landscape.

Available on Google Play. Coming soon to the Apple App Store.

NEXT-GENERATION MOBILE SECURITY

Mobile Threats Have Evolved

Traditional antivirus is no longer enough. Modern attacks bypass signature-based defenses entirely by targeting human behavior, not just software vulnerabilities.

Social Engineering

Manipulating users into revealing sensitive data or granting dangerous Permissions.

Scam Messaging

SMS phishing, fake alerts, and fraudulent notifications delivered directly to Users.

Malicious Apps

Applications that impersonate trusted brands to steal credentials and data.

Impersonation Attacks

Fake websites and domains crafted to deceive even security-aware users.

Today's threats target people, not just devices. Behavioral manipulation has become the attacker's most powerful tool.

The Rise of Scam-Driven Cybercrime

Mobile users are now the **primary attack surface** for cybercriminals worldwide. As desktop defenses matured, attackers migrated their operations to smartphones where security expectations have not evolved as quickly as attack methods.

AI-powered scams are becoming increasingly difficult to detect as attackers use fake voices, cloned identities, and highly convincing phishing content at scale. **Prevention must happen before users ever interact with a threat.**

3X Faster Growth

Mobile fraud is growing three times faster than traditional PC-based attacks.

82% SMS Phishing Rise

Of consumers have received a suspicious text or smishing message in the past year.

\$1T+ Annual Fraud Loss

Estimated global financial losses attributed to mobile-driven digital fraud.

One Intelligent Mobile Protection Platform

Detect. Prevent. Respond.

Real-Time Prevention

Continuous monitoring and real-time analysis of suspicious activity and scam behavior.

Behavioral Intelligence

Analyzes behavioral signals to identify suspicious activity that traditional tools often miss.

Identity Monitoring

Dark web scanning and credential leak detection protect users' digital identities.

Human Expert Support

Certified AnyTech365 technicians provide live guided assistance when users need it most.

Platform Capabilities

A deep dive into the intelligent protection layers that make AnyTech365 AntiScam Mobile uniquely effective against modern mobile threats.

BEHAVIORAL INTELLIGENCE

REAL-TIME PROTECTION

SAFE BROWSING

IDENTITY MONITORING

DEVICE & ANTI-THEFT SECURITY

HUMAN EXPERT SUPPORT

Behavioral Intelligence

Beyond Traditional Antivirus

Signature-based antivirus tools cannot detect what they've never seen before. AnyTech365 AntiScam Mobile uses behavioral intelligence to identify suspicious activity patterns by catching threats that traditional tools routinely miss.

Hidden Screen Overlays

Detects invisible UI layers placed over trusted apps to steal tap gestures and credentials.

Unauthorized Remote Access

Flags attempts by apps or external actors to gain remote control of the device without consent.

Suspicious App Permissions

Identifies apps requesting excessive or anomalous permissions inconsistent with their stated purpose.

Manipulative UI Behavior

Recognizes deceptive interface patterns engineered to trick users into unintended actions.

 Detecting threats that traditional signature-based tools often miss, protecting users from the unknown as well as the known.

Real-Time Scam Protection

Protection Across Everyday Mobile Activity

Real-time analysis of mobile scam activity across messaging, browsing, apps, and user interactions. Helping users identify and avoid suspicious mobile activity across everyday digital interactions.

Scam SMS Detection

Analyzes incoming messages for phishing language, suspicious links, and fraud patterns.

Phishing Link Blocking

Analyzes and flags suspicious URLs associated with phishing and fraudulent activity.

Fraudulent Notifications

Identifies fake security alerts and urgent push notifications used to manipulate user behavior.

Unsafe App Warnings

Flags applications exhibiting malicious behavior patterns before they cause damage.

Safe Browsing & Network Security

Safer Browsing Anywhere

Whether at home, at work, or on the move, users increasingly rely on websites, QR codes, and public networks for everyday digital interactions. AnyTech365 AntiScam Mobile helps reduce risk across these critical mobile touchpoints.

Web & Link Protection

Malicious website blocking in real time.

URL risk scoring and analysis.

Detection of suspicious and fraudulent domains.

Network & QR Security

QR code scanning and risk assessment.

Unsecure Wi-Fi monitoring.

Secure connection recommendations.

Helping users avoid dangerous interactions before exposure happens through intelligent protection designed to support safer decisions.

Dark Web & Identity Protection

Identity & Credential Monitoring

Data breaches expose millions of credentials every month. AnyTech365 AntiScam Mobile proactively monitors the dark web and breach databases by providing timely alerts and actionable guidance when exposed credentials are identified.

Dark web monitoring and breach exposure alerts.

Credential leak and password compromise detection.

Real-time exposure notifications.

Actionable security recommendations.

Account takeover risk reduction.

Identity theft begins long before victims notice.

Early detection is the most effective defense.

Device & Anti-Theft Security

Protection Beyond Malware

Physical device security matters as much as digital. AnyTech365 AntiScam Mobile helps users **maintain control of their devices** in real-life scenarios, from loss and theft to unauthorized access attempts.

Lost Device Assistance

Helps users locate, lock, or remotely wipe a missing device to prevent data exposure.

SIM Change Alerts

Notifies users of unauthorized SIM swaps: a key vector for account takeover fraud.

Unlock Attempt Detection

Monitors and logs failed unlock attempts, flagging unusual access patterns to the device owner.

Remote Wipe

Security-grade capabilities to erase sensitive data and protect against physical tampering.

One Intelligent Mobile Protection Platform

Detect. Prevent. Respond.

Technology alone isn't enough when users are in the middle of a scam. AnyTech365 AntiScam Mobile combines intelligent automation with certified human expertise, available whenever users need expert guidance, reassurance, or direct intervention.

Human Expert Support

Immediate access to certified AnyTech365 technicians via in-app chat.

Guided Scam-Response Assistance

Step-by-step expert guidance through active scam incidents and recovery procedures.

Callback & Remote Support

Authorized remote assistance and callback support for complex security situations.

Subscription Model

Freemium-to-Premium Growth Strategy

Designed for maximum reach and conversion, the tiered model captures users at every stage of engagement and drives upgrades through demonstrated value.

Guest Access

-  Basic app access with limited visibility.
-  Registration prompts to drive sign-up.
-  No active protection features enabled.

FREE Plan

-  Credential Leak Scanner.
-  Full Security Score Scan.
-  Full App Scan.
-  Support Chat Access.

ULTIMATE Plan

-  Secure Firewall (VPN Protection).
-  Proactive Dark Web Scanner.
-  QR & URL Scanner.
-  SMS Scam Scanner.
-  Malicious App Monitoring.

 A proven subscription framework that balances customer value with recurring revenue opportunities.

Partner Opportunity

Built for Distribution at Scale

AnyTech365 AntiScam Mobile is engineered for flexible, large-scale deployment through **telecom operators, ISPs, and service providers**. It creates new revenue streams while delivering measurable customer value.

Ideal Partner Profiles

- Telecom operators and mobile carriers.
- Internet service providers.
- Retail security bundle providers.
- Managed service providers (MSPs).
- White-label partnership programs.

Partner Benefits

- Improve retention and reduce churn.
- Recurring subscription revenue.
- Market Differentiation.
- Measurable Customer Value.
- Co-branded and white-label options.

Why AnyTech365

Trusted Cybersecurity Expertise. Human-First Protection.

AnyTech365 AntiScam Mobile is not just another security app. It is a next-generation mobile protection platform built specifically for today's scam-driven threat landscape, combining behavioral intelligence, real-time protection, and certified human support in a single consumer-friendly solution.

Mobile-First by Design

Purpose-built for smartphone threats, not adapted from legacy desktop security tools.

Behavioral Threat Intelligence

Identifies deceptive behavior patterns commonly associated with mobile scams.

Human + AI Protection

Certified expert support integrated alongside intelligent automated defenses.

Partner-Ready at Scale

Flexible deployment model designed for telecom operators, ISPs, and enterprise partners.

Built for the next generation of mobile threats, combining intelligent protection with expert human support.
