

AnyTech365

AI Powered IT Security

Our mission is simple: Technology should simplify life, not complicate it. Using advanced AI, we protect PCs, laptops, smartphones, IoT devices, and entire home/office networks — giving users complete digital peace of mind. AnyTech365 combines cutting-edge software, expert human support, and seamless services to prevent threats, optimize performance, and eliminate tech headaches.

We are proud founding members of the Global Anti-Scam Alliance (GASA) and actively partner with major retailers, telecoms, ISPs, and consumer electronics brands to bring enterprise-grade security to everyday users.

Our Complete Product & Service Portfolio

AnyTech365 offers a full suite of AI-driven solutions designed for maximum protection, performance, and convenience. All solutions are delivered as easy subscription-based SaaS, covering every internet-connected device with zero hassle.

AnyTech365 IntelliGuard

Our flagship AI-powered integrated software. Provides real-time threat prevention, system optimization, performance boosting, and comprehensive digital protection across all devices.

AnyTech365 Security

Advanced anti-malware, privacy protection, and performance tools in one easy-to-use solution.

AnyTech365 SysCleaner & Optimization Tools

Proactive maintenance that keeps devices running at peak performance.

24/7 Expert Support Services

Remote technical assistance, CyberWarranty, Windows 11 upgrades, HomeOffice security packages, and unlimited support plans.

AnyTech365 AntiScam

Specialized protection focused on stopping online scams, phishing, remote-access attacks, and social engineering before they succeed. It delivers real-time scam detection, blocking capabilities, and expert human support to keep users safe from fraud attempts.

AnyTech365 SecureRouter

Hardware + software solution that encrypts all internet traffic from your home or office network with 256-bit encryption. Features automatic updates, advanced firewall protection, no activity logs, and full privacy — ideal for households and businesses.

AnyTech365 SmallBusiness

Tailored B2B plans for small and medium enterprises.

Benefits for Our Partners

Partnering with AnyTech365 lets you turn customer service from a cost centre into a profit centre. Offer our 24/7 expert support, security software, and AntiScam solutions as a bundled or white-label service with no upfront investment. Earn competitive commissions and revenue shares on every subscription sold. Your visitors/customers receive premium multilingual support (handled entirely by us), while you generate ongoing profit from what used to be an expense. This proven model — successfully implemented with retailers, telecoms, ISPs, and distributors worldwide — boosts customer loyalty and creates new revenue streams.

Proven Success Stories

AnyTech365 has earned the trust of hundreds of thousands of users and major retail partners:

- Excellent Trustpilot Rating with over 17,000 verified customer reviews praising our fast support, effective protection, and easy-to-use solutions.
- Long-term partnerships with leading European retailers (including Media Markt's Enjoy Technology program), telecom providers, and ISPs, resulting in seamless bundled offerings that enhance customer satisfaction and loyalty.
- Recognized with international business awards for innovation in consumer cybersecurity and technical support excellence.

Latest Cooperation: Global Leadership in Anti-Scam Efforts

In March 2026, AnyTech365 became a key partner in the launch of Scam.org — the world's first global AI-powered online anti-fraud platform. Developed by the Global Anti-Scam Alliance (GASA) in collaboration with OpenAI and leading cybersecurity companies, Scam.org provides free education, prevention tools, real-time scam detection, and reporting resources to protect consumers and businesses worldwide.

As a founding member of GASA, AnyTech365 contributes threat intelligence and expertise to this groundbreaking initiative, helping fight the \$442 billion annual cost of online fraud. This latest cooperation underscores our commitment to not only protecting devices but also creating a safer internet for everyone.
